CLAYTON FOUNDATION BIOCHEMICAL INSTITUTE

October 15, 1962

Dr. Joshua Lederberg  
Genetics Department  
School of Medicine  
Stanford University  
Palo Alto, California

Dear Dr. Lederberg:

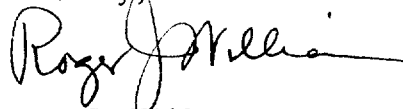

The Clayton Foundation has made it possible for me to give to each member of the Biochemistry Section of the National Academy a copy of my little book NUTRITION IN A NUTSHELL.

I think it will be agreed that this is not exactly a pedestrian effort. Aside from promoting an awareness with respect to the importance and far-reaching potentialities of nutrition (when viewed biochemically) it is hoped that the book may contribute a small bit to the improvement of the status of biochemistry in the eyes of the public. Parts of Chapter VII are particularly pointed in this direction. Scientifically I think biochemists are well thought of, but in the public eye they are often either nonexistent or else are given a seat far back behind that of physicians who can write and sell widely such books as FOLK MEDICINE and CALORIES DON'T COUNT and can get a hearing because they are "doctors."

I think biochemists need to do some promoting so that they can get a hearing when, as in the field of nutrition, they are the qualified experts.

Hope you find the book worthwhile.

Sincerely,

Roger J. Williams  
Professor of Chemistry  
Director, Clayton Foundation  
Biochemical Institute
